GST Reconciliation Tool

User Guide

Purpose

The GST Reconciliation Tool compares the **GSTR-2B Excel file** with the **Tally GSTR-3B Register Excel file** and generates a reconciliation report in Excel format.

System Requirements

- Windows 10 or Windows 11
- Microsoft Excel (to view the generated report)

Required Input Files

- GSTR-2B Excel File
- Tally Register Excel File

How to Use

Step 1

Double-click **GST_Reconciliation_Tool.exe**.

Step 2

Click **Browse** beside **GSTR-2B File** and select the downloaded GSTR-2B Excel file.

Step 3

Click **Browse** beside **Tally Register File** and select the exported Tally Register Excel file.

Step 4

Click **Browse** beside **Output Folder** and choose the folder where the reconciliation report should be saved.

Step 5

Click **Generate Report**.

Step 6

The application will automatically generate and save the report as:

GST_Recon_Report.xlsx

in the selected output folder.

Output

The generated report includes:

- Summary
- Matched Records
- Records Available in GSTR-2B but Missing in Tally
- Records Available in Tally but Missing in GSTR-2B
- Near Match Details (if applicable)

Notes

- Ensure both input files are in Excel format (`.xlsx`).
- Select a valid output folder before generating the report.
- If a report with the same name already exists, it may be overwritten.
